LASTING RELATIONSHIPS

"We have clients that have been with us since we began supporting them in the early 1990's. Our client relationships don't end after the job is done, they continue for years and years because of our personal touch... They know that we really do care about their success. We prove it every day."

- Mylon Staton
President, DataLink

COMPLETE COVERAGE

DataLink is based in Millersville, MD and supports your local, regional, and national locations.

We Make "IT" Easy

ProLink IT Services

Private Cloud & Virtualization

Is your IT team taking care of PCs one user at a time?

Still running dedicated servers for files, email or storage?

ProLink Private Cloud & Virtualization lets you save time and money by...

- Consolidating your infrastructure for better performance, reliability, and availability
- Automating management and upgrades of OS, applications, and workstations
- Streamlining administrative tasks and increasing your control over the entire enterprise
- Improving IT team and resource productivity with less troubleshooting
- Greatly reducing your hardware, power, and operational costs

We'll help you identify, implement and manage the cloud solution that is right for your business – Private Cloud Service in Our Data Center or Your Data Center, Public Cloud, or Hybrid Cloud. You'll get a dedicated account management team – a technician who provides day-to-day support, a business consultant who advises you on advances in technology, and a technology specialist who provides you with high level engineering and design consultation.

Private Cloud Service in DataLink's Data Center...

- No more on-site servers and PCs that need to be replaced every few years
- Users connect to their refreshed and upgraded 'Virtual Desktops' every time they logon and can access corporate IT resources from any device, anytime, anywhere - whether it is their smartphone, iPad, or laptop at home
- True Mobility – Users are no longer tied to the desk
- High Availability – Users are no longer dependent on the power, cooling, or Internet at your office. If your office loses power for instance, users can reconnect to your cloud as easily as going to Starbucks, home, or hopping on their mobile carrier's data
- Users always have free access to the latest Microsoft applications and upgrades
- Virtual services can be provisioned across the cloud instantly without making physical configuration changes to hardware and interrupting user productivity
- Virtualization technology enables your operating systems, apps and workloads to be centralized in a secure SAS70 compliant, Tier-4 data center
- DataLink's infrastructure is safeguarded with built-in redundancy covering every aspect of power, environmental, Internet, and physical security
- Operated as a utility, delivered online, and billed as a monthly service

We Make IT Easy
