

Governance, Risk & Compliance Services

HIPAA Data Security Compliance

THE BUSINESS CHALLENGE

If your organization handles protected health information, as defined in the Health Insurance Portability and Accountability Act of 1996, you are now required to actively protect that information, mitigate risks and strive to avoid data breaches. As part of the HIPAA Security Rules, you must conduct a comprehensive risk analysis and assessment. Failure to take action can result in Federal enforcement.

Organizations that must perform Risk Analysis and Assessments include...

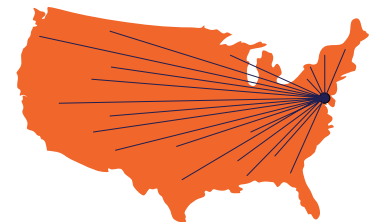

- General Hospitals
- Outpatient Facilities
- Private Practices
- Health Plans & Insurance Providers
- Pharmacies
- Business Associates, Vendors, Contractors of covered entities that work with protected patient and health information

WHAT WE DO...

DataLink helps you meet your HIPAA Data Security requirements. Our team of experts...

- Identify your compliance gaps in advance of an audit
- Remediate any identified gaps ahead of regulatory review
- Save time and money by helping you pass your audits – the first time
- Mitigate the potential for federal enforcement action
- Keep assessments current by addressing changes in the IT environment, including new records management and new devices

Do you have everything in place – systems, tools and plans – to reduce risk? Have you done an assessment to identify risks? DataLink can help you get where you need to be.
