For Immediate Release:

Top Ranked Managed IT Firms In Greater Baltimore

MILLERSVILLE, MD., July 2026

FOR IMMEDIATE RELEASE

Datalink Interactive Recognized Among Greater Baltimore's Largest Managed IT Firms
Ranked No. 18 by Baltimore Business Journal

Datalink Interactive announced today that it has been recognized as one of the Greater Baltimore region's largest managed IT firms, earning the No. 18 spot on the Baltimore Business Journal's 2025 ranking of the area's 35 largest managed IT firms, published July 10, 2026. The list ranks companies based on local employees and highlights leading providers serving organizations throughout the region.

This recognition underscores Datalink Interactive's continued growth and commitment to delivering innovative managed IT services, cybersecurity solutions, cloud technologies, and strategic technology guidance to businesses across Maryland and the Mid-Atlantic.

The Baltimore Business Journal recognition comes on the heels of DataLink Interactive being named to the prestigious 2026 Channel Futures MSP 501, an annual ranking that recognizes the world's top-performing managed service providers for innovation, operational excellence, growth, and customer success. Together, these honors reflect DataLink's ability to deliver industry-leading managed IT and cybersecurity services while maintaining strong growth both regionally and nationally

"Being recognized both on the Baltimore Business Journal's largest managed IT firms and on the Channel Futures MSP 501 earlier this month demonstrates the dedication of our team and the trust our clients place in us every day," said Mylon Staton, President of DataLink Interactive. "These recognitions validate our commitment to delivering secure, innovative technology solutions while helping our clients achieve their business goals."

About DataLink Interactive

DataLink Interactive is a cybersecurity-driven Managed IT Services Provider focused on delivering world-class technology support, consulting, and security solutions to businesses, nonprofits, and public-sector organizations. Founded in 1993 and headquartered in Millersville, Maryland, DataLink helps organizations align technology with business objectives through managed IT services, cybersecurity, compliance programs, cloud solutions, business continuity planning, infrastructure services, audio-visual integration, telecommunications services, structured cabling, and network infrastructure solutions, as well as strategic IT leadership. From designing and implementing reliable voice and data communication systems to delivering scalable cabling infrastructure that supports growth and connectivity, DataLink provides end-to-end technology solutions that keep organizations connected and productive. The company's mission is simple: **"We Make IT Easy."**
