

## SERVICES PORTFOLIO

### Professional Consulting Services

Need advice for a big project or want strategic input that will help you meet your IT goals?

### IT Support Services

We monitor and manage our clients' networks, desktops, and everything in between.

### Corporate Audio, Video Services

Keep your people connected. Conferencing and video room systems save time, money and travel.

### Structured Cable | Wireless Access

As the size and nature of your business changes, so will your need for IT access and more speed.

### Physical Security

There's one thing everyone agrees on - protecting your people and your assets is absolutely critical.

### Business Communications

Our portfolio offers everything from phones to collaboration capabilities that help you keep in touch.

### COMPLETE COVERAGE

DataLink is based in Millersville, MD and supports your local, regional, and national locations.

## We Make "IT" Easy

## Professional Consulting Services

# Industry Applications & Compliance

**Are your applications meeting the performance expectations and regulatory demands of your industry? If not, the risks can add up...**

- Loss of customer confidence
- Potential legal exposure
- Erosion of market share
- Damage to competitive position
- Unwanted attention from government

## It's Your Business

Every industry has a standard quality of service to which customers have grown accustomed. Deviations from the norm – breaches of security, server crashes, slow applications, network outages – may cause them to do business elsewhere. Keeping customers happy requires constant fine-tuning of the complex technology infrastructure over which the industry-specific applications you depend on run. Maintaining expected performance standards may also require a combination of solutions.

## What We Offer

DataLink can recommend proven, integrated solutions tailored to meet the precise needs of your industry, helping you to:

- Meet the requirements of Sarbanes Oxley, HIPAA, SOX, SAS 70, and other mandates
- Improve connectivity between headquarters, data centers, and remote workers
- Maintain data security, compliance and resiliency
- Simplify your core infrastructure with platforms that are reliable, scalable, and secure
- Improve application performance with cloud computing and desktop virtualization
- Protect your server files at an off-site data center or secure collocation facilities

## We Make IT Easy

Leveraging decades of experience serving a range of industries, DataLink can recommend solutions that fit your business model – at a cost that makes sense. Whether you're running a small or medium-sized business, each and every DataLink client is valued. You'll know it, because we'll prove it every day. And it's why for years and years, our client relationships continue.
