# Security Audits, Planning & Design

**Do you know if your data is safe? If not, it may already be lost, stolen or damaged from...**

- Stealth malware that slow down your staff's PCs
- Users who inadvertently download dangerous viruses
- Former employees who can still access your proprietary files
- Intruders who can take down your servers, just for fun
- Hackers who corrupt critical databases

## Benefits of a Security Audit

- Discovers hidden vulnerabilities in systems and networks that can be exploited
- Determines what network locations can benefit from intrusion detection systems
- Indicates potential need to identify intruders for lockout and possible legal action
- Identifies measures to protect email, servers and data against loss, theft and damage
- Highlights specific business processes that need to be made more secure
- Reveals possible need for encryption to safeguard data on servers, workstations, and laptops

## How We Work

DataLink engineers perform a comprehensive Security Audit of your IT systems and networks. Along the way we look for ways to protect your business without unnecessary complication or cost, giving even the smallest firms the affordable protection they'll need to grow fast, without being tripped up by the bad guys.

## We Make IT Easy

If vulnerabilities like these are keeping you awake at night, DataLink has solutions that are right for your organization – at a cost that makes sense. Whether you're running a small or medium-sized business, each and every DataLink client is valued. You'll know it, because we'll prove it every day. And it's why for years and years, our client relationships continue.
