Spam Filtering

Email protection for organizations that want to increase productivity by minimizing spam

Much of daily email traffic is spam. This is not only a distraction, it can serve as an entry point for viruses, malware, and phishing attacks. The proliferation of spam has led to millions of dollars in lost productivity and additional infrastructure costs for businesses.

Those who maintain in-house email servers are fighting a losing battle because spammer tactics are constantly evolving. To defeat spam, DataLink *Spam Filtering* implements defensive technology and techniques that stay ahead of this rapidly changing threat.

ProLink Spam Filtering includes…

- Email screening
- Quarantining
- Delivery of clean messages to your email servers
- 99.9% uptime commitment
- Live phone and email customer support

Your servers will operate under reduced stress by not having to deal with the growing volume of unwanted email and will be better equipped to deal with legitimate email and user requests.

We Make IT Easy

When handling today's IT challenges is keeping you up at night, DataLink has solutions that help you rest easy – at a cost that makes sense.
